Fuller, D S

November 7th, 1917

TO WHOM IT MAY CONCERN:
THIS IS TO CERTIFY.

This is to certify that Mr. D. S. Fuller, B.A. is a Demonstrator in Physics in the University of Toronto, serving in charge of the Heat Laboratory under Dr. Satterly. At present Mr. Fuller is doing work for the University which in the judgment of the Professors in charge of the Department it would be impossible to secure any one else to perform. There are large classes in Physics which must be maintained and the great enlistment from the ranks of the students in the past three years has made it almost impossible to secure persons to undertake the work of demonstrators. We have already employed in this department all the available young women who are capable of filling the posts. The work that Mr. Fuller is now doing is I judge of great importance to the University and to the country, and it would be a misfortune were we compelled to drop it.

Mr. Fuller has always worked during the summer on his father's farm of 180 acres at Forest. He was intending to remain on the farm this winter but came to the University at our earnest request.

President.
